

Initial disclosures. Connected signing.

A connected path from disclosure delivery to the Encompass eFolder.

Hitch helps mortgage lenders simplify initial disclosure signing with an electronic signature workflow connected to Encompass® by ICE Mortgage Technology®. Through Encompass Partner Connect™, borrower signing in Hitch stays connected to the lender's document workflow.

THE DISCLOSURE-TO-eFOLDER WORKFLOW

1

Initiate disclosure delivery

Loan officers start disclosure delivery in Encompass.

2

Review and sign in Hitch

Borrowers review their initial disclosures and sign electronically in Hitch.

3

Return signed documents

Completed PDFs return to the lender's Encompass eFolder.

Keep the workflow moving. Connect borrower signing with the loan file and help reduce manual document handoffs between disclosure delivery and completed PDFs.

See the workflow in action.

Contact Hitch for a walkthrough and to discuss your loan programs, lender setup, integration availability, and implementation requirements.
